Date: October 9, 2019
Location: 747 Market, Tacoma Municipal Bldg., Conference Room 248
Time: 5:30 p.m.

1. ACKNOWLEDGEMENT OF INDIGENOUS LANDS

2. ROLL CALL

3. CONSENT AGENDA
   A. Excusal of Absences
   B. Approval of Minutes: 9/25/19

4. BOARD BRIEFINGS
   A. 507 South Ainsworth (Wedge Neighborhood Historic District) Kesh Chavda, Kesh Design Lines LLC 10 mins

5. PRESERVATION PLANNING/BOARD BUSINESS
   A. Heritage Trees Michael Carey, Urban Forest Program Manager 10 mins
   B. Call for New Commissioners Staff 5 mins
   C. Events & Activities Update Staff 5 mins

6. CHAIR COMMENTS

Next Regular Meeting: October 23, 2019, 747 Market Street, Tacoma Municipal Bldg., Rm. 248 5:30 p.m.

This agenda is for public notice purposes only. Complete applications are included in the Landmarks Preservation Commission records available to the public BY APPOINTMENT at 747 Market Street, Floor 3, or online at www.cityoftacoma.org/lpc-agenda. All meetings of the Landmarks Preservation Commission are open to the public. Oral and/or written comments are welcome.

The City of Tacoma does not discriminate on the basis of handicap in any of its programs or services. To request this information in an alternative format or to request a reasonable accommodation, please contact the Planning and Development Services Department at (253) 591-5056 (voice) or (253) 591-5820 (TTY).

MINUTES (Draft)
Landmarks Preservation Commission
Planning and Development Services Department

Date: September 25, 2019
Location: 747 Market Street, Tacoma Municipal Building, Room 248

Commission Members in Attendance:
Kevin Bartoy, Chair
Roger Johnson, Vice-Chair
Marshall McClintock
Jennifer Mortensen
Carol Sundstrom
Holly Stewart
Jeff Williams

Commission Members Excused:
Alex Morganroth
Lysa Schloesser

Commission Members Absent:
N/A

Staff Present:
Reuben McKnight
Lauren Hoogkamer
BT Doan

Others Present:
Katie Pratt, Northwest Vernacular
Alison Beason, City of Tacoma
Jennifer Wiedermann, Wiedermann Architecture
Erika Selig, Wiedermann Architecture
Tim Ladwig, Custom Home Solutions LLC
Andy Wagner
Tina Friedrich
Elizabeth Dorsett

Chair Kevin Bartoy called the meeting to order at 5:31 p.m.

1. ACKNOWLEDGEMENT OF INDIGENOUS LANDS

2. ROLL CALL

3. CONSENT AGENDA
   Agenda was approved as submitted.

   a. Excusal of Absences
      • Alex Morganroth
      • Lysa Schloesser

   b. Approval of Minutes: 8/14/2019 and 8/28/2019
      The minutes of the meetings on 8/14/2019 and 8/28/2019 were approved as submitted.

   c. Administrative Review
      • 811 N. Ainsworth Ave.—façade removal
      • TAM Sign
      • 2802 N. Carr St.—paint/deck replacement

4. NOMINATIONS TO THE TACOMA REGISTER—PUBLIC HEARING

   a. 423 North D Street, Charles Hebard and Franke Tobey Jones House
      Chair Bartoy called the public hearing to order at 5:33 p.m.

      Ms. Hoogkamer read the staff report as provided in the packet.

      Katie Pratt, Northwest Vernacular, reiterated that the house was a well-designed and intact example of the Colonial Revival style in the neighborhood. The nomination was also made based on the significant philanthropic work of Franke Tobey Jones (criteria B).
Commissioner Williams recused himself from the vote on this nomination, as he sold the house to the current owner.

There were no public comments on the subject. Chair Bartoy closed the public hearing at 5:38 p.m.

Commissioner Stewart made a motion: “I move that the Landmarks Preservation Commission recommend to the City Council that 423 North D Street, Charles Hebard and Franke Tobey Jones House, be included on the Tacoma Register of Historic Places, including the following elements – the house and garage – finding that it does meet Criteria B and C of TMC 13.07.040.”

Commissioner Mortensen seconded the motion. It passed unanimously.

5. PRESERVATION PLANNING/BOARD BUSINESS

a. Tacoma Equity Map
   Alison Beason, Equity and Human Rights, introduced herself and provided an overview of the equity index. She explained the background and the five components of the index: Livability, Economy and Workforce, Education, Civic Engagement, Equity and Accessibility. The components were drawn from study results of community members’ visions for the City. Ms. Beason defined “index” as a general term with examples and went on to define “equity index.” A map of equity indices in the City was presented. She also pointed out attention-worthy data points and used examples of specific districts to show how the data affected the index. In conclusion, Ms. Beason showed the Commission both versions of the website (GIS and user-friendly). She gave a demonstration on how to navigate the websites and manipulate the data to see different charts and maps of any selected area.

   Commissioner Williams inquired about how the Landmarks Preservation Commission could apply the equity index to better serve the public. The website has information on historic landmarks in the City that could provide insight to the Commission. For example, the Commission could utilize the maps in determining if the owner of a historic landmark had the financial means to afford a restoration, or what would be a reasonable alternative.

6. BOARD BRIEFINGS

a. 811 N. Ainsworth Ave. (North Slope Historic District) New Construction
   Mr. McKnight read the staff report as provided in the packet.

   Jennifer Weddermann, Weddermann Architecture, stated that the existing structure did not respect any code on setbacks, especially the side and the front of the house. All other houses in the neighborhood are fairly evenly front-loaded. She was looking for guidance from the Commission on how to rebuild on the property. She presented hard-copy of drawing of the house in respect to other houses in the neighborhood.

   A clarification was made that there were no historic features left on the house. Chair Bartoy commented on the owner’s behavior, which was in complete disregard of historic preservation guidelines and of public safety. Commissioner McClintock informed the Commission that the front façade was down as of before the meeting, which Ms. Weddermann was not aware of. Mr. McKnight noted that the owner had obtained a permit from the City to take down the façade but seemed to have failed to communicate with his architect.

   Discussion ensued. Commissioner McClintock inquired about the lot coverage of the proposed house and the footprint of the attic. Commissioner Williams commented that the mass of porch on the 2nd floor cut the house in half creating an odd appearance. Chair Bartoy noted that the new structure was dominant compared to the other structures of the building, which possibly was because the upper windows were larger bringing more emphasis to the upper portion. Commissioner Williams stated that the Commission had already approved a plan including the existing structure. The approved plan should be carried over and followed, even with the façade is now taken down.

   The Commission discussed the proposed Craftsman style structure with Ms. Weddermann and explained why it was not recommended. The guidance from the Commission was to use the previously approved plan and the...
construction guidelines, as well as to research houses in the neighborhood to draw up a new structure.

b. 1416 N. 11th St (North Slope Historic District) Roofline Alteration
Ms. Hookgamer read the staff report as provided in the packet.

The owners of the property, Andy Wagner and Tina Friedrich, explained their difficulty in spacing and limited lot, which eliminated the option of expanding the footing of the house nor the basement. Also presented were picture examples of how they proposed to extend the roofline to get more space.

The Commission was concerned that the proposed new roofline would significantly alter the appearance of the house, especially when viewed from the alley in the back of the house. The Commission recommended extending the basement, and objected the proposed plan or any plan to change the roofline.

c. Lot adjacent to 1521 N. 5th St. (North Slope Historic District) New Construction
Ms. Hookgamer read the staff report as provided in the packet.

Tim Ladwig, Custom Home Solutions LLC, presented a 3D rendering of the proposed new house and examples of the houses next door, emphasizing features that the proposed house would mimic from its neighbors.

Discussion regarding minor details and suggestions for the proposed design ensued. The material and width of the corner siding were discussed. The Commissioners were okay with a hardy material and wide siding. Commissioner Williams recommended changing the French doors on the 2nd floor and the side of the 1st floor, they looked out of place with other doors of the house. Chair Bartoy requested to see the plan in comparison with the neighboring houses, especially in terms of elevation.

7. PRESERVATION PLANNING/BOARD BUSINESS

a. Vice-Chair Election
Chair Bartoy thanked Commissioner Williams for filling in at the last meeting and asked for any self-nominations before proceeding to nominations. Commissioner Johnson self-nominated after some encouragement from fellow Commissioners.

The self-nomination was favored by other Commissioners and passed unanimously.

b. Events & Activities Update
Ms. Hoogkamer reported to the Commission that the North Slope Walking Tour had 80 people. She also briefly went over each event with flyers provided in the packet.

Commissioner McClintock informed the Commission that there would be a memorial for the Luzon building on Thursday, September 26, 2019, at 7:30 p.m., at the World Wars building display.

Staff asked for suggestions for the 2020 Conference. The Commission will be asked to volunteer at the conference.

Commissioner Sundstrom noted that 424 N. D St. would be on the tour of remodeled homes.

8. CHAIR COMMENTS
The meeting was adjourned at 7:50 p.m.

*These minutes are not a direct transcription of the meeting, but rather a brief capture. For full-length audio recording of the meeting, please visit: [http://www.cityoftacoma.org/cms/One.aspx?portalid=169&pageid=67980](http://www.cityoftacoma.org/cms/One.aspx?portalid=169&pageid=67980)
STAFF REPORT

BOARD BRIEFINGS

AGENDA ITEM 4A: 507 South Ainsworth Avenue (Wedge Neighborhood Historic District)
Kesh Chavda, Kesh Design Lines LLC

BACKGROUND
Built in 1911, this is a contributing structure in the Wedge Neighborhood Historic District. The applicant is proposing to add a second story deck and patio doors to the front façade. The project includes adding bedrooms to the basement and making repairs to the existing home and garage.

ACTION REQUESTED
This is an informational briefing for Commission feedback. No action is requested.

PRESERVATION PLANNING/BOARD BUSINESS

AGENDA ITEM 5A: Urban Forest Management Plan Overview
Michael Carey, Urban Forest Program Manager

At this meeting, staff will provide a briefing on the Urban Forest Management Plan development, which has the potential to include a Landmark Tree Program. The City of Tacoma along with a team of consultants are in the process of developing an Urban Forest Management Plan (UFMP) to create a shared vision and road map for the trees in Tacoma. This will focus on themes throughout the city such as Resource Management, Equity and Accessibility, Canopy Health & Growth, Long-Term Funding, Climate Resiliency, Enhanced Ecosystem Services & Benefits, and Community Engagement & Stewardship. It will also include municipal code review and amendments, policy and planning updates (similar to the Environmental Action Plan, but for trees), and new or tailored public incentive programs and engagement strategies. More information is available on the website www.TacomaTreePlan.org.

ACTION REQUESTED
This is an informational briefing for Commission feedback. No action is requested.

AGENDA ITEM 5B: Call for New Commissioners
Staff

BACKGROUND
The Tacoma City Council is looking for applicants to fill the following positions on the Landmarks Preservation Commission:

- **Architect (One Position):** Open to an individual who is currently or has been in the past a professionally certified architect.
- **Professional (Two Positions):** Open to individuals who have had professional experience or training related to historic preservation originating from employment or study within the following disciplines: Arts or art history, architecture, history, architectural history, planning, prehistoric and/or historic archeology, conservation, construction or building trade, landscape architecture, urban planning or design, structural engineering, land use or real estate law, real estate, appraisal or real estate finance, project management or contracting, or related discipline.
- **At Large (One Position):** Open to individuals who have a demonstrated interest and familiarity with basic historic preservation issues, either through professional practice or volunteer work, and shall be residents within the boundaries of the City.
- **Non-voting Wedge Neighborhood Ex Officio (One Position):** Open to a resident, property owner, or business owner within Tacoma’s Wedge Neighborhood Historic District.
- **Non-voting North Slope Ex Officio (One Position):** Open to a resident, property owner, or business owner within Tacoma’s North Slope Historic District.

Applications must be submitted to the City Clerk’s Office by Tuesday, October 22, 2019. To apply, please visit [cityoftacoma.org/cbcapplication](http://cityoftacoma.org/cbcapplication) or contact Michelle Emery at (253) 591-5178, [servetacoma@cityoftacoma.org](mailto:servetacoma@cityoftacoma.org); or the City Clerk’s Office, located at 733 Market St., Rm. 11, Tacoma, WA 98402.

**PROPOSED EXTERIOR COLOR:**

| BODY | TRIM |

- Brick chimney to be cleaned and pointed. Repair as necessary.
- Corbels to remain and repainted.
- Siding to remain. Scraped, repair damaged and rotted wood. Painted complete house siding, trim facia boards, posts etc.
- Wood railing's with posts to match pillars below. Balusters to be determined but will match type for period of house (For reference see sheet 2).
- These houses are within a block of the property.
- New railings as above. Currently no railings and not to code.
- Painted wood doors with casing & trim to match gable casing above.
- New roof and gutters proposed to match existing.
- Porch roof to be rebuilt. Current one is rotted and not stable. In the process will structurally confirm to IRC standards for deck above.

**NOTE:** Proposed exterior & interior remodel will follow the city of Tacoma Design guidelines (Dec 2016) with a emphasis on Preservation and sustainability.

USE CODE: 1141-Otho Family-Dwelling
200FEET
LOT SIZE: 5,000 ft. (120 x 201)

PROJECT NARRATIVE

Existing building is in a designated Historic neighborhood. Some of the original features are in need of renovation but windows have been replaced that do not fit in with the character of the property. The remodel will mainly consist of repairing any rotted rotting or damaged wood on the exterior (mainly siding). Exterior painting and front porch repairs. Proposed on the porch is to add above a deck with railings that match the original lower front pillars. Also the front two windows are of different size and at some point have been replaced and look out of place. Proposed is adding two wood single french doors with trim & casing that matches the existing window trim in place of these two windows using the existing headers.

There are houses in the area that have the deck & railing feature which will maintain (as close as possible) the original character of the building as well as the neighborhood.
**Roof Truss Details**

Per R802.10 Wood Trusses

1. All trusses shall be manufactured from Exterior Grade lumber.
2. All trusses shall be produced and finished to manufacturer's specifications.
3. All trusses shall be designed and fabricated in strict compliance with AWC Engineering Specifications.
4. Truss members shall be dimensioned for a minimum of two layers of exterior grade plywood sheathing on the bottom and top flanges.
5. All connections shall be No. 10 galvanized nails. One 10d or larger per truss bay.
6. All metal connectors shall be manufactured from corrosion-resistant materials.
7. All designs shall be reviewed by a licensed structural engineer.

**Braced Wall Details**

BRACED WALL PANELS A, B, C & D:

Per IRC 602.10.5 Continuous Plywood Sheathing Overlap sheathing at corners

FASTERNERS: 16d Box (3 1/2" x 0.135") 12" O.C. face nail

Per IRC Fastening Schedule Table R602.9(1)

**Foundation & Wall Details**

Concrete Slab at Garage Foundation

PROPOSED RE BUILD GARAGE
1. EXECUTIVE SUMMARY

Trees in communities amplify human experience and wellbeing. Their provision of valuable economic and environmental benefits as natural resources is well documented\(^1\). Even so, urban and community tree canopy cover is decreasing across the nation. Urban tree cover in the U.S. dropped by 0.2 percent between 2000 and 2018 while impervious cover increased 2.8 percent\(^2\). This reduction of community tree canopy cover occurred concurrently while many tree protection ordinances, canopy cover goals and land conversion policies across the country attempted to arrest or reduce canopy decline. Community leaders and planners focused on urban tree canopy growth must encourage comprehensive and diverse tree resource policies for their community in order to promote equitable access to the benefits of urban canopy.

Trees make cities more livable. Research on the public health, economic and social benefits of urban forests and their relative economic value, is relatively new but well documented. Community leaders and planners who interact with projects through the lens of urban and community forestry will improve the wellness and quality of life for Tacomans. Enabling tree planting for public across the City for future generations.

Urban tree canopy benefits vulnerable populations. Urban tree canopy reduces ambient temperatures within cities substantially. Research shows a casual reduction of heat-related illnesses throughout a city with advanced urban tree canopy. Trees reduce concentrations of airborne particulate matter, the most damaging type of air pollution globally and clinically more represented in industrial cities. The environmental benefits for urban trees directly correlate with improved human wellbeing and public health.

It is this public health initiative that strongly factors urban forestry and green infrastructure into environmental justice and social equity. A successful urban and community forest is qualified by more than the measurement of its benefits, but by definition includes the fair and equitable access to such provided benefits to all community members.

---

Long-term urban and community forestry funding is multi-faceted. There is no single beneficiary of urban tree benefits and likewise, limiting the funding source to one source (utility or the general fund) puts limitations on how that budget can be spent, as well as placing unintended barriers on collaboration across departments. Long-term funding for urban forests requires budget portfolio diversification to be successful. Urban forestry is a complex ecology which intertwines many different agencies and organizations, both public and private. Urban forestry and City-wide tree canopy care is not an isolated concern, it is impacted by many of the goals and policies with Tacoma’s comprehensive plan.

A comprehensive urban forest strategy will guide us towards a sustainable urban forest future. In early 2019, the City of Tacoma solicited the development of the Urban Forest Management Plan (UFMP), subsequently awarding the contract to urban forest and green industry planning firms PlanIT Geo, Peninsula Environmental Group and Conservation Technix (collectively the “Urban Forestry Team”).

A component of the project—an analysis and revision of urban and community forestry policy and Tacoma Municipal Code (TMC)- where necessary. This document, the urban and community forest policy pre-prospectus, intends to assess the effectiveness of existing tree-related policy and municipal code within Tacoma, and introduce new (to Tacoma) concepts standardized in the industry for urban and community forestry policy.

To date, the Urban Forestry Team has conducted multiple phases of collaborative stakeholder engagement aimed at identifying existing policy and processes. Staff interviews were conducted including nearly 30 staff members representing multiple departments, workgroups and commissions. Informal meetings were conducted with multiple Councilmembers to better capture the intent and feasibility of conceptual urban & community forestry policy and TMC revisions.

1.1 EXISTING POLICY AND CODE:

**Urban Forest Policy (UFP) Element.** In 2010, Council adopted the UFP Element of the Comprehensive Plan (later referred to as “One Tacoma”), which identified a 30% tree canopy cover goal by the year 2030, “30 by 30”. This UFP defines core focus areas including changes to regulations and standards to address tree retention, as well as leading by example through responsible planting, care and maintenance of trees on City-owned property.

**Tacoma 2025.** In 2015, Tacoma’s ten-year, City-wide Strategic Plan and Vision (Tacoma 2025) was adopted. Several key community priorities were identified, including improving community health and the vitality of our Neighborhood Business Districts, and sustaining and improving Tacoma’s Natural Environment. Studies show a direct correlation between improved human health and more vibrant and profitable business districts in areas with higher quality tree canopy.

**Urban Forest Manual (UFM).** In 2014, Tacoma’s Environmental Services Department published Volume 3 of the Tacoma UFM. The UFM is a technical guide created to facilitate the planning, design, installation and maintenance of landscaping that is required for new development and redevelopment per TMC, Title 13.06.502 Landscaping and Buffering Standards. The UFM is intended to be used concurrently with TMC, Title 13.06.502 to ensure the requirements and standards are executed properly. This manual can also be used as a guide for the planning, design, installation and maintenance for any landscaping project.

**Environmental Action Plan.** In 2016, the City’s EAP was adopted by Council with a focus on increasing healthy urban forest canopy. Specific EAP actions include improving regulations to encourage tree preservation and protection on private property and in the City right-of-way, as well as developing an Urban Forestry Implementation Strategy that identifies and prioritizes strategic and equitable planting locations, incentives, public engagement and education, retention strategies and maintenance.

**TMC benchmarking and analysis.** Peninsula Environmental Group analyzed existing TMC related to the urban and community forest. This analysis of TMC identified discrepancies and informed us further on staff challenges brought up during the staff interviews. Existing TMC was then benchmarked across multiple Washington communities, ranging in size and population. This benchmark informs community leaders and planners on the regional status of urban and community forest planning and protection, and effective regulatory vehicles applied in the process.
1.2 SUMMARY RECOMMENDATIONS
The Urban Forestry Team has identified updates to specific urban and community forestry policy to amplify the sustainability of the urban forest, resulting in a greener and healthier city for all Tacomans.

1) **Identify and align Urban Forestry Management Plan goals and actions with One Tacoma policy.**

2) **Develop new independent Urban and Community Forestry Title in TMC.**

3) **Renovate existing sections of TMC to remove discrepancies and align with best-management-practices.**

2. ALIGN URBAN FOREST POLICY WITH ONE TACOMA

How can adaptive and deliberate urban forest planning complement the efforts of One Tacoma?

One Tacoma is a fundamental piece of the Urban Forest Management Plan. Collectively the Urban Forestry Team will prepare recommended polices and actions through this lens, to both amplify and compliment it’s visioning. While focused on Tacomans value and responsibility towards a greener city, the Urban Forest Management Plan will implement actions to meet these city policies.

An analysis of One Tacoma was prepared with a focus on the urban forest to identify current policies and where improvement was necessary to meet the guidelines of One Tacoma. We identified seven leading urban forest elements directly associated with these policies. These seven elements, listed below, will facilitate the policies through direct, actionable policy items defined in the Urban Forest Management Plan. Table 2, on the following page, is a brief primer on how the urban forest elements correlate with One Tacoma, and how the two complement each other.

3. CONSOLIDATED URBAN FORESTRY TITLE

Urban forests are instrumental to the fabric of city life. The planning, management, growth, preservation, and long-term funding of Tacoma’s urban forest are necessary actions for the public good. These urban forestry actions result in amplified health, safety and welfare of Tacoma’s citizens. City growth and redevelopment impacts and influences the urban forest. The urban forest complements urban design. Therefore, the new Consolidated Urban Forestry Title should be implemented.

It is important for community leaders and planners to facilitate a deliberate inter-sectoral and collaborative approach to urban forest planning that mitigates the barriers associated with interconnected and diverse public planning goals.

A focused, single-source for urban and community related municipal code, located in a new Title, will help Tacoma achieve its goal of 30% City-wide tree canopy by 2030. A new Urban & Community Forestry Title will document the importance of trees and urban canopy for community leaders, City staff and citizens well into the future.

This effort will mitigate inconsistencies across TMC chapters and provide a “one-stop shop” for tree related issues, topics, and procedures. Developers and other permittees will more clearly understand requirements as it relates to the urban forest.

A recent study by Nature Conservancy\(^3\) noted a barrier to long-term urban forest funding are informational and organizational silos. To prevent these silos, redeveloping City staff workflow, permit effectiveness and departmental collaboration is a focus of this recommended Title consolidation. Focusing the efforts of multiple public agencies and departments across the municipal organization, and structured by the new Title, creates opportunities to advance tree planting and tree protection to meet Tacoma’s 30/30 goal.

A single-source chapter for City ordinances related to tree planting and protection align to One Tacoma through multiple urban forestry references, particularly Environmental + Watershed Health Policy EN-4.30, “Increase awareness of urban forest best management practices...”

Currently, tree-related code in Tacoma is generally accessed through an action occurring rather than the resource itself. Tree related code in Tacoma is activated through commercial and industrial development and through environmentally sensitive (Critical Areas) code. At this time, the Urban Forest Team plans to retain development triggered tree-related code in development sections. Lateral transition of these specific codes may result in confusion for property owners, developers and staff.

Outcomes from a consolidated Urban Forestry Title in Tacoma Municipal Code:

1) Compliments and implements UF-1.5, EN-1.1, EN-4.30, EN-4.31 of One Tacoma into Urban Forestry Policy.

2) Single source of policy for urban forest related topics, outside of urban forest standards triggered through development/disturbance actions.

3) Improve cross-sectoral urban forestry processes; increase permit efficiency and workflow processes.

4) Promote greening policies through regulation, incentives and stewardship.

5) Define roles and responsibilities of an existing committee/commission such as the Sustainable Tacoma Commission or newly created committee/commission to manage the new Title.

Table 3: Preliminary Urban and Community Forestry Title Topics:

1) Definition of Tacoma’s Urban Forest
2) Landmark Tree Protection
3) Right-of-way Tree Protection and Management
4) City-wide Tree Planting Goals
5) Reference to Tacoma Urban Forest Manuals and other Policies
6) Tree Pruning Standards
7) Urban Forest Committee/Commission

3.1 LANDMARK TREE PROTECTION AND INVENTORY – SUMMARY
Landmark tree policies acknowledge the scientific consensus that large trees provide substantially more social, public health and environmental benefits than small trees. Tree growth correlation to tree benefits is an exponential one. Mature large trees, those greater than 40 feet tall and/or 30 inches in diameter, deliver on average an annual net benefit two to six times greater than mature small trees. The presence and stature of large trees has a measurable human health impact, relieving stress, decreasing respiratory illness by providing particulate matter deposition on leaves, and inspiring awe in the community.

Common themes in landmark tree ordinances across Washington and the nation:
1) Potential Landmark trees can be voluntarily or non-voluntarily designated.
   a) Voluntary designation by the property owner is generally coupled with title recording on the property mandating the preservation of the tree while the tree remains healthy.
   b) Non-voluntary/mandatory – designation applies to trees that meet a certain criteria, most often a combination of size and species, that immediately protects a tree from removal or mal-pruning while the tree remains healthy.
2) Designation committees for voluntary designation of landmark trees can be a public urban forester, municipal arborist, City Council or committee, or tree board.
3) Documentation and inventorying of voluntary landmark trees is often facilitated through a landmark tree database and tree management software.
   a) This list is often in conjunction with historical society’s and historical tours, and could potentially be managed through the City’s Landmarks Preservation Commission.
4) Qualifying criteria for landmark trees normally contain subjective and/or objective requirements for historical, cultural, ecological significance, or other important qualifying attributes.

One Tacoma Design + Development Goal 5 and 13 align with the protection, preservation and resilience of historic, cultural, and landmark elements within Tacoma. Specifically, policies DD-5.11, DD-13.5 and DD-13.6 correlate with the protection of landmark trees.

---

5) Variances and relief of landmark tree protection are often provided through the following:

a) High-risk rating through qualified Tree Risk Assessor and/or conspicuously dead trees.

b) Spatial conflict of actively permitted development/redevelopment are exempt.

c) Utility work as necessary to retain utility connectivity are exempt.

d) Other large public land-owning organizations with their own Urban Forest Management Plan or similar document can be exempt.

**Outcomes landmark tree protection and inventory:**

1) Compliments and implements DD-5.11, DD-13.5 and DD-13.6 of One Tacoma into Urban Forestry Policy.

2) Conservation of culturally or historically relevant City landmarks that have importance to a community.

3) Ecological inventory of large, important trees and economic quantification of their provided ecosystem services.

4) Species diversity improvement—often landmark trees will be trees of special ecological significance and rare species presence, resulting in a higher species richness across the City.

3.2 **RIGHT-OF-WAY TREE PROTECTION AND MANAGEMENT**

The “right-of-way” (ROW) is defined as (typically) an easement provided to the City over the land of the abutting property owner, which establishes an accessory right for public benefit or transportation, such as for roadways, sidewalks, or utilities. According to TMC 8.30.020,

“The public right-of-way includes the area of land, the right to possession of which is secured by the City for right-of-way purposes and includes the traveled portion of the public streets and alleys, as well as the border area, which includes, but is not limited to, any sidewalks, planting strips, traffic circles, or medians.”

Currently, the City of Tacoma requires abutting property owners to maintain adjoining rights-of-way. This includes streets and alleys extending from the owner’s property lines out to the curbs or edges of pavement (includes sidewalks and planting strips) if improved, or if unimproved (unpaved), out to the centerlines of the road. There are several places in the Tacoma Municipal Code where these obligations are stated: Chapters 9.17, 9.18, 8.30, 8.31, and 12.09.

Street trees, curbs, sidewalks, and utilities play vital roles in Tacoma’s public realm, helping to make the City more livable and sustain the quality of life. It is not uncommon for conflicts to arise between trees and infrastructure, particularly in locations where they were installed some time ago. These conflicts can compromise pedestrian access to the sidewalk and/or tree health.

Each tree and infrastructure conflict is unique and should be appropriately addressed given the conditions of the multiple elements impacted or impacting the situation. Instilling proper right-of-way tree protection and management will enable the City to implement practices and procedures that maintain the quality of life for the citizens of Tacoma while supporting ongoing initiatives such as the 30% tree canopy by 2030 and requirements set by ADA.

**Common outcomes of right-of-way tree protection and management include:**

1) Maintained and enhanced urban forest accessibility to support equity and social justice.

2) Reasonable and justifiable tree preservation that considers all variables and impacts. Right-of-way tree protection does not imply all trees are absolutely preserved. Trees are inventoried and evaluated to determine their fate in an infrastructure conflict situation.

3) Protection of trees during construction and infrastructure repair/replacement/installation prevents devastating damage to trees which could otherwise cause tree decline, need for removal, and potential public hazard.

4) Reduced tree risk, increased tree longevity, tree canopy retention, reduced tree maintenance costs, proper tree care, improved public health, reduced infrastructure conflicts, and equitable access to the urban forest.
5) A decision matrix with various mitigation strategies or amendments to address the tree and infrastructure conflict by considering existing conditions among other variables. See the Seattle Trees & Sidewalks Operations Plan as an example.

Outcomes of the UFMP to support right-of-way tree protection and management:
1) Improved permitting system that will alert the appropriate City personnel for reviewing and evaluating a situation where trees may be impacted.
2) Cyclical inventory and assessment of trees in the right-of-way to identify potential risks, trees in decline, pests and disease threats, monitoring needs, and treatment needs. Continual monitoring of trees in the ROW will inform future management decisions and tree/infrastructure mitigation approaches.
3) Appropriate tree species selection for new plantings in the rights-of-way.
4) Tree planting best practices such as appropriate soil volume, irrigation needs, proper planting depth, quality tree nursery stock, and young tree care (e.g. scaffold branches, lowest permanent branch, central leader).

3.3 CITY-WIDE TREE PLANTING GOALS
Tacoma’s 30% City-wide canopy goal is achievable with well-planned tree canopy growth. Planting trees without equitable access of benefits, adequate spatial capacities and poor genetic selection are common challenges that result in an unhealthy urban forest and misspent budgets. Solving these discrepancies requires careful consideration of urban design and engineering and tree-resource management, translated through the lenses of social equity and environmental justice. This may require tailored strategies, new policies and increased resourcing for these areas. The existing policies/procedures will not provide more equitable access to the urban forest resources. Proven tree planting policy goals and municipal code are equity driven, prioritized by asset generation, contain measurable performance standards, are adaptive and provide feedback.

In pursuit of Tacoma’s 30/30 goal, the Urban Forestry Team are strategically applying the following datasets to inform decisions on canopy growth priorities, areas with missing or inequitable tree canopy, and areas historically low in tree canopy.

1) Land-use and environmental characterization data
2) Canopy cover data & tree inventory data
3) Tacoma’s Equity Index
4) Urban heat island index

One Tacoma’s Environmental + Watershed Heath chapter, policy EN-4.29 calls out Tacoma’s initiative to have 30% City-wide tree canopy by 2030.

Common themes in tree planting goals and policies across Washington:
1) Consistent application, regulation and stewardship across land-use, stakeholders and time.
2) Long-term commitment to equitable tree canopy growth at all levels of City government.
3) Identify and define best management practices in tree planting and care, as well as adopting internal procedures to ensure trees are not only planted well but also succeed and establish into mature trees.
4) Sequence tree planting and mitigation designs and selection using environmental and physical criteria.
5) Coordination with street engineering/design and urban design to promote maximum tree benefits with the built environment.
Outcomes from outlining City-wide Tree Planting Goals:

1) Compliments and further implements EN-4.29 of One Tacoma into Urban Forestry Policy.

2) Focus budgets and planning mechanisms to realize the goal of 30% City-wide tree canopy by 2030.

3) Accelerate informed decision making on site-specific and environmentally accurate tree species. Improved access to information on approved and prohibited tree species within the City.

4) Align permitting and trigger processes for re/development actions where supplemental tree installation is a viable co-design. Reduce missed opportunities for collaborative tree planting and green urban design.

5) Increased urban forest biodiversity and ecological resiliency through planned natural resource management techniques. Appropriate species selection while adapting genetic diversity to climate change.

6) Accelerate growth of urban forest benefits. Large trees with contiguous tree canopy provide scientifically more environmental and ecological benefits that small trees and fragmented canopies.

7) Reduced conflict with City infrastructure. Planning for urban trees from the inception of project design alleviates common future conflicts with utilities, sidewalks and other street infrastructure. Currently, this is captured in Title 12 “Utilities” in the TMC.

4. EXISTING TACOMA MUNICIPAL CODE RENOVATION

The first tree protection ordinance in Tacoma, and Washington State, was adopted in 1927 as “9.18 Trees and Shrubs – Trimming and Removal”. This called for the protection of Tacoma’s street trees growing in the right-of-way (see 9.18.030). From then, a number of tree, vegetation, plant and forest-related municipal codes have been added through a long history of Tacoma ordinances. Some of this municipal code is heavily antiquated and its applicability has eroded with time.

The TMC Renovation task is aimed at the following:

1) Fix inaccuracies and discrepancies in existing code.

2) Updating old antiquated municipal code relating to trees.

3) Addressing several inconsistencies/conflicts between existing TMC and Policies.

4) Updating and consolidate authority to approve actions (e.g. City Manager, Director of Public Works, City Engineer, Committee).

5) Resolving references to permits and processes that no longer exist.

6) Removing inconsistencies with industry best-management-practices.

7) Fixing conflicts between critical areas and right-of-way codes.

We’ve identified 110 tree-related code references with existing TMC, of which 37 contained outdated and inaccurate information related to current urban forest policy.

Environmental + Watershed Health Policy EN-4.30 mentions the importance of actively pursuing urban forest best management practices.
Broadening Horizons in Historic Preservation Lecture Series

The events are free and open to the public. For more information about the Tacoma's Historic Preservation Office events, visit us online at cityoftacoma.org/HPEvents

**DIVERSITY IN HISTORIC PRESERVATION**
Architect Claudia Kiyama, M.Arch
September 26 at 5:30 p.m.
Murray Board Room on UPS Campus
(1500 N. Warner St, Tacoma)

**SUSTAINABILITY IN HISTORIC PRESERVATION**
Professor Kathryn Rogers Merlino
October 10 at 5:30 p.m.
Honey Café
(1322 Fawcett Ave, Tacoma)

**ORAL HISTORY AND RACE IN TACOMA**
Professor Andrew Gomez
November 14 at 5:30 p.m.
Honey Café
(1322 Fawcett Ave, Tacoma)

The lecture series is sponsored by the City of Tacoma's Historic Preservation Office, Tacoma Historical Society and Historic Tacoma.

For more information about the events or to request an interpreter or access accommodation, please contact Lauren Hoogkamer by email at landmarks@cityoftacoma.org or call (253) 591-5254.
6th Annual Holiday Heritage Swing Dance

Save the First Dance

Friday, November 8th • 6PM–9PM

Mcmenamins Elks Temple, Spanish Ballroom

Live Music by Pierce County Community Big Band
Dance Demos by Studio 6 Ballroom

Info
Join us at the newly restored Elks Temple for a night of dancing featuring the Pierce County Community Big Band and dance demos by Studio 6 Ballroom. Suggested donation for entry goes to support heritage events and programming in 2020. Presented by the Landmarks Preservation Commission.

Presented by the Landmark Preservation Commission.
