ADDENDUM NO. 2 DATE: 3-8-2024

REVISIONS TO:
Request for Bids Specification No. PW23-0090F
TPU S 17th St Court D/E

NOTICE TO ALL BIDDERS:

This addendum is issued to clarify, revise, add to or delete from, the original specification documents for the above project. This addendum, as integrated with the original specification documents, shall form the specification documents. The noted revisions shall take precedence over previously issued specification documents and shall become part of this contract.

REVISIONS TO THE SUBMITTAL DEADLINE:

The submittal deadline remains the same.

REVISIONS TO THE PLANS:

Revision #1
Replace the following project plan sheets with the attached plan sheets including Addendum #2 revisions (4 pages/plan sheets):

1. Sheet No. 7 / Sheet DTL-4 of DTL-4
2. Sheet No. 8 / Sheet D-1 of D-1
3. Sheet No. 10 / Sheet C-2 of C-2
4. Sheet No. 12 / Sheet PW-1 of PW-1

REVISIONS TO THE SPECIFICATIONS:

Revision #1
Replace contract specification section 2-03 with the attached specification section 2-03 (2 pages) noted as a part of this Addendum #2.

Revision #2
Replace contract specification section 8-40 with the attached specification section 8-40 (4 pages) noted as a part of this Addendum #2.
REVISIONS TO THE PROPOSAL PAGES:

Revision #1

Replace bid proposal in the bid submittal and specifications with the attached bid proposal with Addendum #2 noted at the top of each new bid proposal page. (10 pages)

NOTE: Acknowledge receipt of this addendum by initialing the corresponding space as indicated on the signature page. Vendors who have already submitted their bid/proposal may contact the Purchasing Division at 253-502-8468 and request return of their bid/proposal for acknowledgment and re-submittal. Or, a letter acknowledging receipt of this addendum may be submitted in an envelope marked Request for Bids Specification No. PW23-0090F Addendum No. 2. The City reserves the right to reject any and all bids, including, in certain circumstances, for failure to appropriately acknowledge this addendum.

2-03 ROADWAY EXCAVATION AND EMBANKMENT

(******)

2-03.1 Description
The last sentence of the first paragraph is deleted.

2-03.3 Construction Requirements
This section is supplemented with the following:

All roadway excavation shall be handled, hauled, and disposed of as contained-in determination (CID) contaminated material. The Contractor shall haul and dispose of all contaminated soil material excavated from the Project site in accordance with the Contract, Plans, and Specifications to LRI Landfill, located at 30919 Meridian Street East, Graham, WA 98338 in accordance with Special Provisions Section 2-17. The Contractor shall not include the cost of the disposal fees in the bid item. The City of Tacoma will pay the disposal fees directly to LRI.

All soil from roadway excavation activities will be disposed of off site and shall be considered unsuitable fill material.

2-03.3(5) Slope Treatment
This section is deleted.

2-03.3(19) Removal of Pavement, Sidewalks, Curbs, and Gutters
This section is deleted.

Section 2-03.3 is supplemented with the following:

2-03.3(20) Field Adjustment
(******)

Field adjustment involves adjustments to horizontal or vertical alignments, or vault elevations, that are shown in the plans or directed by the Engineer and will be performed as needed, by the Contractor, to address issues with drainage, utility vault construction, street crowning, cross slopes, curb ramps, and connections to existing grades for the finished product. The Contractor and the Engineer shall collaborate on field adjustment. All grade checking needed to complete the field adjustments shall be provided by the Contractor. The Contractor shall continue work, during the field adjustment time, in unaffected areas of the Project, in accordance with the Plans and Specifications. Some localized delay is inherent in this process, and the contractor shall be prepared to collaborate and move crews on to other work locations. For each field adjustment the City of Tacoma shall pay the Contractor by Force Account in accordance with Section 1-09.6. The contractor shall not be entitled to additional compensation due to delays from field adjustments.

2-03.5 Payment
This section is supplemented with the following:

The unit Contract price per cubic yard for “Roadway Excavation - CID Contaminated, Incl. Haul” shall be full compensation for all costs incurred for excavating, loading, disposal and haul of contained-in determination (CID) contaminated material to LRI Landfill. The Contractor shall not include the cost of the disposal fees in the bid item. The City of Tacoma will pay the cost of the disposal fees directly to LRI.

“Unsuitable Foundation Excavation - CID Contaminated, Incl. Haul”, per cubic yard

The unit Contract price per cubic yard for “Unsuitable Foundation Excavation - CID Contaminated, Incl. Haul” shall be full compensation for all costs incurred for excavating below subgrade per Section 2-03.3(14)E, loading, disposal and haul of contained-in determination (CID) contaminated material to LRI Landfill. The Contractor shall not include the cost of the disposal fees in the bid item. The City of Tacoma will pay the cost of the disposal fees directly to LRI.

“Field Adjustment”, by Force Account

END OF SECTION
Section 8-06  ADDENDUM #2  
TPU S 17th Street Court D/E Project

**8-40 POWER UTILITY WORK**

(*******)

8-40.1 Description

This work shall consist of furnishing and installing power utility vaults, related structure excavation and trench excavation, installation of power duct banks with pull lines, and flowable thermal backfill placement (FTB). The City of Tacoma Power Utility crews shall install power cables and wiring in coordination with the Contractor.

8-40.2 Materials

Material Standards are according to Tacoma Power Standards. Applicable standards are included in the Appendix of these Contract Provisions.

Power Vaults shall be installed in accordance with C-UG-1500. The Vaults available from some local suppliers may be slightly bigger in size, and can be 5000 lbs heavier. The Contractor shall be responsible to investigate the size and weight of vault components and provide shop drawings at least 5 days prior to the start of installation. The City of Tacoma may make adjustments to vault detail sheets for excavation limits and foundation elevations upon receiving shop drawings.

Electronic Tracer Ball: 3M EMS 1402 Electronic Tracer Ball or Tacoma Power approved equivalent.

8-40.3 Construction Requirements

Tacoma Power Utility standards as included in the appendix shall govern. Otherwise trench excavation, structure excavation, and installation of conduits and structures shall be in accordance with Sections 2-09, 7-05, and 7-08, 8-20, 9-29 while Section 8-40 shall govern.

Power Duct banks, Power Vaults, and trench excavation shall be in accordance with the Plans and Specifications, and Tacoma Power Utility standards. All conduits and ducts shall be installed with pull lines.

Vaults:

The Contractor shall install Power Utility Vaults in accordance with the Plans, Tacoma Power Standards, and these Special Provisions. Construct a 8-inch compacted thickness, level foundation pad under the entire vault, extending 1-foot out from the vault base. The foundation pad shall be constructed with crushed surfacing top course (CSTC) compacted to at least 95% of maximum density in accordance with Section 4-04.3. The Contractor shall adjust the lids and covers to finished grade, and install a single 2” sump drain for pump connection at each vault from existing knockout through the new curb to empty to the gutter flow line. A sump drain detail is included in the Plans.
Where new duct banks are connected to a new vault per the Plans, the Contractor shall use the vault knock-outs to make an opening and extend the ducts including pull-lines into the vault. The opening shall be cemented and sealed with non-shrink Grout Type 2 or Mortar Type 3 per WSDOT Standard Specifications Sections 9-20.3(2) and 9-20.4(4).

**Structure Excavation, Vaults, Trenches, and Duct Banks:**

The Contractor shall haul and dispose of all contaminated soil material excavated from the Project site in accordance with the Contract, Plans, and Specifications to LRI Landfill, located at 30919 Meridian Street East, Graham, WA 98338 in accordance with Special Provisions Section 2-17.

Structure Excavation Class B horizontal paylimits shall coincide with duct bank dimensions including the CDF or FTB volume. The lower paylimits shall be the bottom of CSTC foundation under a vault and coincide with the bottom of a duct bank including the CDF or FTB volume. The upper trench excavation pay limits shall be the existing ground surface or the bottom of any sidewalk or other pavement removal.

Structure Excavation for vaults shall be in accordance with Sections 2-09, and shall be included in the quantity for “Structure Excavation Class B Incl. Haul____”, per cubic yard. **Horizontal paylimits for Structure Excavation for Vaults shall be at 2 foot horizontal distance from the outside of the vault wall.**

Power duct banks shall be encased in Flowable Thermal Backfill (FTB) or CDF to a depth in accordance with the Plans and these Special Provisions. The outside dimensions of each duct bank section as shown in the Plans define the limits for FTB or CDF placement. The remainder of the back fill shall be crushed surfacing top course (CSTC). Install an Electronic Tracer Ball in the topmost, centermost duct at locations where newly built conduit banks do not terminate into a vault.

**Connect Existing Ductbank into new Vault**

The Contractor shall connect an existing duct-bank into a new vault where shown per the Plans. At these locations the Contractor shall cut the existing duct-bank up to 10 feet from the proposed vault wall or as necessary for installing the new vault and extending the ducts into the vault.

The final construction scenario will be dependent on the actual depth of the conduits within the ductbank, and the Contractor shall field adjust the design detail in coordination with the Engineer. This may involve reversing vault top and bottom section, installing conduit connections into the vault wall, adjusting the vault foundation elevation, or installing PVC bends in conduits to line up with the connection points. The City will pay for any field adjustments by force account under “Field Adjustment” in accordance with these Special Provisions and Section 2-03.

The City will pay for any changes that result in additional Vault customization that is not shown per Plans for new or existing vaults under “Minor Change” by Force Account.
8-40.4 Measurement

“Connect Existing Ductbank into new Vault”, shall be measured per each new vault wall where a ductbank connection is constructed into the vault including all duct extensions.

Power Utility Vault shall be measured per each vault furnished and installed in accordance with the Plans and Specifications, and Tacoma Power Utility standards.

“___Conduit Bank” shall be measured per linear foot along the alignment of the power conduit bank trench.

Flowable Thermal Backfill (FTB) and CDF shall be included in the measurement per linear foot for “___Conduit Bank”.

“Electronic Tracer Ball” shall be measured per each tracer ball installed in accordance with these Special Provisions and TPU Power Standards.

“Structure Excavation Class B Incl. Haul___” shall be measured per cubic yard in place before excavation to the paylimits per Section 8-40.3.

8-40.5 Payment

“Connect Existing Ductbank into new Vault”, per Each

The Contract unit price per each for “Connect Existing Ductbank into new Vault” shall be full compensation for all labor, equipment and materials to cut and remove and dispose of the existing duct bank as necessary per Plans and Specifications, to make an adequate opening in the vault wall, and to connect and extend existing ducts with new duct lengths, including pull lines, into the new vault per the TPU Power Standards, and to cement and seal the opening per the Special Provisions and Specifications.

The City will pay for any field adjustments by force account under “Field Adjustment” in accordance with these Special Provisions and Section 2-03.

The City will pay for any changes that result in additional Vault customization that is not shown per Plans for new or existing vaults under “Minor Change” by Force Account.

“Power Utility ___Vault” per Each

The Contract price per each for Power Utility ___Vault shall be full compensation for all labor, tools, equipment, and materials to furnish and install the complete vault, including single 2” sump line, to cement and seal duct connections, and to adjust the lids and covers to finished grade all in accordance with the Plans, Special Provisions and Specifications.

“Power Utility 818 Vault”, per each

“Power Utility 814 Vault”, per each

“Power Utility 687 Vault”, per each
“___Conduit Bank”, per linear foot

The Contract price per linear foot for “___Conduit Bank” shall be full compensation for all labor, tools, equipment, and materials to install the power conduit bank including pull lines and FTB, and to construct connections into the vaults, all in accordance with TPU Power Standards, the Plans, Special Provisions and Specifications. The outside dimensions of each duct bank section as shown in the Plans define the pay-limits for FTB.

“Section A Conduit Bank”, per linear foot
“Section B Conduit Bank”, per linear foot
“Section C Conduit Bank”, per linear foot
“Section D Conduit Bank”, per linear foot
“Section E Conduit Bank”, per linear foot
“Section F Conduit Bank”, per linear foot
“Section G Conduit Bank”, per linear foot
“Section H Conduit Bank”, per linear foot
“Section I Conduit Bank”, per linear foot
“Electronic Tracer Ball”, per Each

The Contract price per each for Electronic Tracer Ball shall be full compensation for all labor, tools, equipment, and materials to furnish and install the electronic tracer ball.

END OF SECTION
The undersigned hereby certifies that he/she has examined the location and construction details of work as outlined on the Plans and Specifications for Project No. PWR-01216 and has read and thoroughly understands the Plans and Specifications and contract governing the work embraced in this improvement and the method by which payment will be made for said work, and hereby proposes to undertake and complete the work embraced in this improvement in accordance with said Plans, Specifications and contract and at the following schedule of rates and prices:

NOTE: 1. Unit prices of all items, all extensions and total amount of bid should be shown. Show unit prices in figures only.

2. The notations below the item numbers refer to the specification section where information may be found regarding each contract item. These notations are intended only as a guide and are not warranted to refer to all specification sections where information may be found.

The bid items are grouped as follows:

Group R: Roadway Bid Items
Group P: Power Utility Bid Items
Group L: Lump Sum Bid Items

Summarize totals as indicated on the pages that follow below:

Specification Number: PW23-0090F  ADDENDUM #2

TPU S 17th Street Court D/E Project
Proposal for Incorporating Recycled Materials into the Project

In compliance with RCW 70A.205.700, the Bidder shall propose below, the total percent of construction aggregate and concrete materials to be incorporated into the Project that are recycled materials. Calculated percentages must be within the amounts allowed in Section 9-03.21(1)E, Table on Maximum Allowable Percent (By Weight) of Recycled Material, of the Standard Specifications.

Proposed total percentage: _________________ percent.

Note: Use of recycled materials is highly encouraged within the limits shown above, but does not constitute a Bidder Preference, and will not affect the determination of award, unless two or more lowest responsive Bid totals are exactly equal, in which case proposed recycling percentages will be used as a tie-breaker, per the APWA GSP in Section 1-03.1 of the Special Provisions. Regardless, the Bidder’s stated proposed percentages will become a goal the Contractor should do its best to accomplish. Bidders will be required to report on recycled materials actually incorporated into the Project, in accordance with the APWA GSP in Section 1-06.6 of the Special Provisions.
