- D. CONTRACTOR will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

1. ON-CALL NATURE OF WORK

The citywide contract that results from this specification will be available for use by all City of Tacoma (City) departments, including those of Tacoma Public Utilities (TPU). The contract will be administered by purchasing but work performed under the contract will be ordered and coordinated by project managers throughout the City.

1.1 Line-Item Quantities and Contract Value

Quantities given in the proposal pages and total contract value are not guaranteed but rather an estimate based on historic usage. Actual contract value and quantities will depend on the work ordered, authorized, and performed under the contract.

If the contract includes line items to allow for work outside of that explicitly described in these specifications, supplier will provide the contract administrator with a complete description of the item and associated pricing, prior to approval to project manager approval to perform the work.

1.2 Remote Location

Services will occasionally be required at remote city facilities. The price evaluation form and rate card solicit pricing for mobilization to sites outside of the City of Tacoma or immediately surrounding areas. See Appendix A for more information on remote locations.

1.3 Consideration when Bidding

All contract items with individual measurements should be bid with consideration that services will not be delivered at once but through individually ordered projects at various locations. It is the respondent's responsibility to ensure that line-item pricing supplied includes all associated work and fees to satisfactorily complete the described work. Unit pricing will not be adjusted post submittal to accommodate fees and charges unforeseen by the respondent.

1.4 Right to Terminate

The City of Tacoma reserves the right to terminate the contract if the supplier does not comply with the requirements of these specifications. The City will be the sole judge of the supplier's ability to meet the requirements of this paragraph. If the contract is terminated within the initial twelve-month contract period, the City reserves the right to contact the next responsible and responsive apparent low bidder(s) and execute a contract for the services included in these specifications.

2. CONTRACT ADMINISTRATION

Following contract execution but prior to any work being performed under the contract, supplier will attend a kickoff meeting with purchasing and other city stakeholders including but not limited to EIC staff, LEAP staff and potential project managers throughout the city. No work should be performed prior to this meeting.

Topics discussed and requirements for projects completed under the contract may be captured in a Contract Administration Plan and that plan will be used to track progress and performance of the contract, to identify and resolve any issues that arise.

Supplier must identify a main contract administrator that can be contacted for any and all communications regarding the administration of this contract.

Prior to commencement of any work under the contract, supplier shall provide all required LEAP documentation to the LEAP Coordinator at a location, time and date determined by the LEAP Coordinator.

3. INDIVIDUAL PROJECT COORDINATION

3.1 Assignment of Work

Projects to be executed under this contract will be initiated using the Work Request Form (See Appendix D). Upon receipt of a Work Request Form, supplier will return a quote, demonstrably aligned with the pricing of the contract within seventy-two (72) hours. The Work Request Form should capture all items, quantities, and measurements to be used in confirming project completion.

An approved Work Request Form will serve as notice to proceed. It is the supplier's responsibility to maintain record of projects executed under the contract and the associated approval to perform work. A signed work request form, with legible city project manager and approver may be required prior to approval of invoices.

Supplier may be required to attend a meeting specific to the project, prior to performing work. All approved work will be completed within the timeframe agreed upon in the Work Request Form and/or at the meeting.

3.2 Pre-Work/Pre-Construction Meeting

For individual projects, a project manager may choose to have a pre-work meeting. If held, minutes of the meeting will be sent to the supplier and all meeting attendees including but not necessarily limited to purchasing, LEAP and EIC offices.

3.3 Site Meeting

Project Managers will schedule site meeting on an as-needed basis during a project. Supplier attendance at such meetings is required. Project managers will discuss the need for site meetings with the supplier. Items agreed upon at any such meeting may be documented and become part of the project file.

3.4 Jurisdictional Requirements and Permits

By entering into a contract pursuant to these specifications, the supplier represents familiarity with city and county standards for all work included in this solicitation. It is the supplier's responsibility to be familiar with all current jurisdictional restoration requirements at the time of bid submission. Following award, supplier will stay current with all

jurisdictional requirements and will notify the City upon discovery of new or modified requirements that may affect the contract.

At the time of award, all current city and county standards where work may be completed are adopted as part of the contract and requirements whether they are specifically listed or not. Supplier is responsible for clarifying any pertinent requirements prior to performing any specific project.

Supplier will be responsible to obtain all required permits and approved traffic control plans. Within the limits of the City of Tacoma this will be coordinated through Environmental Services Site Development. Supplier will work under the City's permit in Pierce or King Counties as well as other municipal jurisdictions.

Construction projects within the City of Tacoma limits shall be coordinated with the City of Tacoma, Public Works Department, Mark Henry, Construction Manager, at 253.591.5771.

3.5 Field Engineering

3.5.1 Survey Reference Points

The contractor shall protect survey control points prior to starting site work and preserve permanent reference points during construction.

Promptly report to the engineer/project lead the loss or destruction of any reference point or relocation required because of changes in grades or other reasons.

Survey control damaged by the contractor shall be replaced by City forces and paid for by the contractor.

3.5.2 Established by Engineer

The engineer shall establish the baselines, catch basin locations, concrete slab locations, and utility vault locations with vertical control together with suitable number of benchmarks adjacent to the work as required for specific projects.

Contractor's work shall conform to the horizontal and vertical controls unless deviations are obtained from the engineer.

The contractor shall keep the engineer/project lead informed in advance of the times they intend to do work, in order that lines and grades may be furnished. All requests for the survey crew to be at the job site shall require at least four (4) days advance notice to the engineer/project lead.

The engineer/project lead may adjust or relocate any portion of the project to meet site requirements or to improve the project without additional compensation to the contractor, provided such adjustments do not represent appreciable costs for additional labor and materials as determined by the engineer/project lead.

3.5.3 To Be Established and Maintained by Contractor

Based upon the information provided by the engineer/project lead, all other lines, grades, and detail surveys necessary for the execution and completion of the work, including slope stakes, batter boards, and other working points, lines, and elevations, shall be established and maintained by the contractor.

After lines and grades for any part of the work have been given by the engineer, the contractor shall be held responsible for the proper execution of the work to such lines and grades, and all benchmarks, reference points and stakes given shall be carefully preserved by the contractor until authorized by the engineer/project lead to remove them. The contractor shall be responsible for any mistakes that may be caused by the unnecessary loss or disturbance of such benchmarks, reference points and stakes.

The contractor shall be financially responsible for additional stakeout performed by the engineer as required to replace survey reference points destroyed during construction.

The engineer reserves the right to check all work, have free access to all work, and shall have the full cooperation of the contractor in so doing.

3.6 Coordination with Others

It is possible that other contractors or the City will be working in the project areas during the time of construction. It shall be the responsibility of this contractor to coordinate its work with all other agencies and/or contractors within the project area.

All construction activities shall be coordinated daily, or as required, with the engineer/project lead or their designated representative. Changes to the schedule that will impact on dates shown as milestones on the schedule shall be coordinated with the engineer/project lead.

3.7 Archaeological Investigations

At the Cowlitz and Cushman Hydroelectric Projects, archaeological evaluation may be required, if excavation occurs. A certified professional archaeologist who meets the Secretary of Interior's guidelines for professionals and who is approved by the City will be involved prior to commencing work. Depending on the outcome of the initial evaluation, onsite monitoring may be required. Archaeological services will be procured and paid for by the City.

It is doubtful that cultural resources will be encountered at the hydro projects. However, if cultural resources are discovered as part of this project, archaeological evaluation will be required.

Due to determination of findings, the contractor may be required to change their method of operation to a method that has less impact on the site and is approved by the archaeologist.

3.8 Protection of Existing Utilities and Improvements

In addition to Section 3.03 “Notification of Other Governmental Agencies and Utilities When Underground Work is Involved” and Section 3.07 “Protection of Workers and Property” of the General Provisions:

The contractor shall protect from damage the utilities and all other existing improvements not provided for in the proposal or special provisions. The cost of labor, equipment and materials required to protect or replace said items shall be incorporated into the bid for the project.

3.9 Superintendent

The contractor shall employ a competent superintendent (foreman) who shall be present at the project site at all times during the entire progress of the work, except those times when the contractor is demobilized. The superintendent shall be on site even when only a subcontractor is working, unless otherwise approved by the engineer/project lead. The foreman shall be satisfactory to the contractor and shall have full authority to act on their behalf.

4. BILLING AND INVOICING

4.1 Registration

Awardee must be willing to register, and become fully transactional, in the City of Tacoma’s Ariba portal. A master contract number will be assigned and department specific subagreements will be created as work is ordered.

4.2 Invoices

In order for a proper invoice to be received, it must be submitted in Ariba against the appropriate departmental sub agreement and must include all required documentation:

4.2.1 Approved Work Request Form, including original quote if requested by the department.

4.2.2 PDF invoice attachment including line-item detail aligned with the pricing terms included in the price evaluation form in these specifications. *

4.2.3 If the invoice includes line items to allow for work outside of that explicitly described in these specifications, supplier will provide documentation adequate to demonstrate approval by contract administrator and alignment with project manager approved quote.

Invoices will only be approved following 100% completion of the project. Should a project extend beyond thirty (30) days, progress payments can be approved. Filing of certified payrolls is prerequisite to the approval of any progress payments.

4.3 Intents and Affidavits for Citywide Contracts

Separate intents and affidavits will need to be filed for each sub agreement. The information contained in the Intents and Affidavits for On-Call Contracts document in Appendix D will apply to each sub agreement rather than the contract as a whole.

4.3.1 Intents must be filed for the sub agreement that will be invoiced prior to any work commencing.

4.3.2 Certified payrolls must be filed no less frequently that prior to invoicing for any progress payments. For contracts that are used in an ongoing basis, weekly certified payrolls should be filed both in LCP tracker and on the Department of Labor and Industries website.

4.3.3 Affidavits for work against each sub agreement must be filed no less frequently than annually from the effective date of the contract.

4.3.4 Departments will close out subagreements no less frequently than once annually from the effective date of the contract.

5. REPORTING CAPABILITIES
