1. BACKGROUND

The City of Tacoma recently created the pilot Neighborhood Planning Program (NPP) aimed to define a unique vision and action plan for specific neighborhoods within the City. The NPP was created in response to the community's desire for more equitable delivery of services, economic development efforts, urban design, and capital investments to individual neighborhoods. Additionally, the program is also intended to address goals and policies from the *One Tacoma Plan* targeted to specific geographic areas of the City.

The NPP is a collaborative and place-based planning approach which considers the unique needs, opportunities, and challenges for specific neighborhoods. The overarching goal for each neighborhood will be to create a Neighborhood Plan with a clearly articulated vision, strategies, investments, and programs that will enhance community conditions, protect natural and cultural resources, and elevate economic opportunity for residents and businesses.

To learn more about the City of Tacoma, visit www.cityoftacoma.org.

2. MINIMUM REQUIREMENTS

Proposals shall demonstrate experience and capabilities pursuant to the following:

- Conducting community engagement with diverse populations and using culturally competent communications and feedback methods.
- Compiling existing conditions analysis relating to land use, transportation (including multimodal and parking), environmental/cultural resources, property ownership, community assets, and other infrastructure.
- Conducting mapping and spatial analysis using geographic information systems datasets.
- Defining economic development strategies and housing/community development incentive programs.
- Supporting implementation of neighborhood investment, multi-stakeholder projects, and community capacity-building programs.
- Writing neighborhood planning documents including content, illustrations, and layout.
- Translating and communicating complex planning issues for multilingual public audiences and using a variety of graphic, written, and digital formats.
- Performing community planning in an urban context, including working with a wide array of community and agency stakeholders.
- Familiarity with the Washington Growth Management Act (GMA), and an understanding of the *One Tacoma Plan*, local planning issues and initiatives in the City of Tacoma, and the City's overall regulatory framework.

3. SUMMARY OF SCOPE OF SERVICES AND DELIVERABLES

It is the City's intent to select a consultant based on qualifications and abilities of the firm and key project individuals.

Background Information on the Neighborhood Planning Program and Pilot Neighborhoods

NPP Priority Neighborhoods and Outcomes – At the onset of the program, the Tacoma City Council identified two neighborhoods as priorities for the pilot year of the NPP; the McKinley Neighborhood and the Proctor District. Through the NPP, the City and its consultant partner will create a Neighborhood Plan (Plan) for each neighborhood. The Plans will document the planning process including (a) a community engagement plan and participant feedback, (b) an existing conditions analysis, (c) the community's vision, (d) an alternatives analysis (for potential enhancement projects), (e) planning diagrams/conceptual drawings, and (f) a list of implementation strategies. The NPP includes an in-depth and robust community engagement plan for each neighborhood, which will be led by City staff but supported by the selected consultant partner in an as-needed basis. The City of Tacoma will provide the consultant team with geographic information systems (GIS) datasets that will be used for analytical and mapping purposes.

For the purpose of the NPP, the City defines “neighborhood” as the [Mixed-Use Center](#) pursuant to the *One Tacoma Plan* and the surrounding residential areas. These boundaries may be redefined/adjusted during the planning process, but it is important to include public amenities (such as parks and schools) that service the neighborhood core.

McKinley – McKinley is a traditional, mixed-use neighborhood located atop the hill southeast of Downtown Tacoma. Its proximity to the Tacoma Dome transit center (including Express Bus and Commuter Rail service and future Link Light Rail service) makes it ideal for a transit-oriented neighborhood. McKinley Avenue serves as the neighborhood's business district and residential streets stem from this primary corridor. The corridor is lined with traditional buildings though some suburban style developments have occurred over the years. Parks, schools, and civic institutions are scattered through the neighborhood. For decades, McKinley has experienced economic decline and a lack of basic community services. However, the neighborhood is experiencing renewed private investment in residential properties, infill development, and business startups.

The McKinley Plan will focus on:

- Building neighborhood capacity and community
- Supporting a vibrant business district
- Neighborhood identity/character
- Creating a healthy and sustainable neighborhood
- Community engagement for the future of the Gault School site

Proctor District – Proctor is a rapidly urbanizing, mixed-use neighborhood located northwest of Downtown. N Proctor Street and N 26th Street form the business district which has an array of urban housing, commercial services, and civic destinations (e.g., elementary and middle schools, a post office, and library). The district is urban in character – its original buildings are traditional in form and small in scale, whereas recent infill projects are large, multistory buildings. Low-scale residential surround the business district though there are cultural institutions, multifamily housing, and neighborhood commercial enclaves scattered through the neighborhood. The district is experiencing substantial investment and quickly urbanizing.

The Proctor District plan will focus on:

- Managing change and growth

- Traffic safety and parking
- Creating a healthy and sustainable neighborhood
- Community engagement for the adaptive reuse of the Cushman & Adams Substations

Consultant Scope

The consultant team will be tasked with the following components for each neighborhood. These components (and associated deliverables) will be integrated into final Neighborhood Plans for McKinley and the Proctor District.

Component 1: Existing Conditions / Demographics Summary – The Consultant Team will explore and document the area’s existing conditions that will serve as a baseline for planning decisions in each neighborhood. This would include a review of the physical conditions, public services, and land use/zoning designations. The Consultant will also summarize the demographic conditions for each neighborhood with comparative City and County statistics. This analysis will include, at a minimum, the following elements:

- Community Assets
- Public Services / Civic Institutions
- Commercial Services
- Housing (type, units, condition, etc.)
- Parks/Open Space
- Transportation/Mobility (roads / transit service / sidewalks / bicycle facilities)
- Utility Service (water and sanitary sewer)
- Zoning / Land Use (allowable uses, dimensional standards, design requirements)
- Committed/planned capital improvement projects (e.g., street/transit/park projects)
- Demographics Summary (population, ethnicity, household characteristics, income)

Deliverables: Technical memorandum of existing conditions, technical memorandum of demographic findings, and associated mapping.

Component 2: Property Inventory – The Consultant will conduct a property inventory for the neighborhoods by applying various GIS datasets to identify sites that would be most conducive for infill, adaptive reuse, redevelopment, and/or enhancement activities. The inventory process will apply a scoring system for each property condition that would collectively identify priority catalyst redevelopment sites based on vacancy, size, and/or underutilized status. At a minimum, the inventory process will apply the following datasets:

- Parcel Identification Number
- Size
- Zoning / Future Land Use Designation
- Vacancy Status (underdeveloped land and/or vacant building)
- Improvement to Land Value Ratio (calculate land value vs. building value – land worth more than the structures indicate underutilization)
- Building Condition / Age

Deliverables: Technical memorandum of inventory findings, property inventory map(s) in PDF and shapefile formats, and spreadsheet of property conditions.

Component 3: Community Engagement Support – The Consultant will support City staff to implement community engagement plans for each neighborhood. The Consultant would provide facilitation, graphic, and reporting support for engagement events, stakeholder meetings, direct community outreach, and public surveys. The Consultant will assist City staff to organize participant feedback, identify key themes, and articulate neighborhood priorities.

Deliverables: Maps/exhibits and facilitator staffing; event summaries and thematic analysis.

Component 4: Action Plan – The Consultant will assist City staff in devising an action plan (or implementation plan) that identifies near- and long-term initiatives that will advance the community's vision in both near- and long-term time horizons. The action plan may be displayed as a matrix listing strategic actions/projects, the responsible party/entity, resource allocation needs, and phasing. The consultant will also create a public-facing version of the action plan and final planning document (component 8).

Deliverable: Spreadsheet or matrix that details the recommended action plan in editable digital format; public-facing action plan document in PDF format (including maps/graphics as needed).

Component 5: Final Planning Document – The Consultant will produce a final planning document that summarizes the objectives, process, stakeholder feedback, and implementation strategies (i.e., this document will serve as the Neighborhood Plan). The Consultant will package together other deliverables into this single document. The Consultant should incorporate graphics and quality layout principles to achieve a visually interesting and easy-to-follow document.

Deliverables: Final planning document with attachments/appendices in a PDF format. Final layout file in editable format (e.g., Adobe InDesign file).

Component 6: Implementation Support – The Consultant will assist City staff in implementing short-term strategies as outlined in the Action Plan. Consultant support may include facilitation of community/stakeholder task forces, research on successful programs or identification of funding/financing opportunities, or preliminary analysis/site plans of specific properties or sites.

Deliverables: Meeting agendas and summaries; technical memos; and/or research and analysis documentation.
