Subject: NO fossil fuel expansion.
Date: Tuesday, August 17, 2021 10:54:16 AM

IPS Committee ,

Dear IPS Committee,

Our community has been asking the City to stop fossil fuel expansion for the past four years. We are asking yet again. it's more important to stop right now than it has ever been before, If a 13 year old can recognize that fossil fuels are wrong and stealing our future you should be able to see that too. you are willingly letting people die if you sit there and continue to kill the earth.

I was quite disappointed when the City Council failed to adopt the non-interim regulations as proposed by the City Planning Department. These would have included a ban on fossil fuel expansion. Just as in their first recommendation four years ago.

I also understand that some council members were poised to amend the non-interim regulations to death, and that is why the Mayor put it to a vote to send it to your committee. From my point of view, this is just further wheel spinning and delay to let industry do as it pleases. We don't need more studies or review - we know exactly what we need to do. So let's do it.

I hope you will prove me wrong by maintaining the ban on fossil fuel expansion as you do your own take on the non-interim regulations. Ideally, I'd ask that you include a ban on the establishment of any new fossil fuel industry, no matter the size (as I understand it anything under a million gallons is allowed).

Undoubtedly industry will turn to talk of biofuels to try and seek expansion of their facilities. It would be good for you to know that two refineries built for biofuels in the PNW ended up just processing fossil fuels in the end. If the fossil fuel companies are so keen to do biofuels, which are of questionable sustainability and scalability to my knowledge, then let them use whatever storage tanks they currently have. We don't want to be home to another refinery spewing toxins into our air, biofuel or not.

We need to start transitioning Tacoma away from fossil fuels or we'll be left behind and dealing with a toxic legacy when the rest of the country converts to green, renewable energy and industry. Why can't we attract a turbine manufacturer here? With the port and rail access it would be perfect for distribution.

Please remember that the City passed a climate emergency resolution. Banning fossil fuels is the next logical step. Then we need to start weaning off them, and rapidly. I noticed that the climate education promised in the Climate Emergency Resolution oddly didn't include Council Members - would be great to see you all insist on having that education for yourselves as well.

I hope you will deliver to us the fossil fuel regulations we need.

Subject: Tacoma Needs Room to Sustainably Grow
Date: Friday, August 13, 2021 7:32:51 AM

IPS IPS Committee ,

Dear IPS Chair & Vice-chair,

Tacoma is growing fast, and that means we need sensible policies to make sure that growth is not at odds with the surrounding environment. We must ensure we limit fossil fuels in Tacoma so that as we continue to grow, we are not exposing more people to increased risks from air pollution that comes from industry and transportation. If we pass strong Tideflats regulations we can ensure polluting industries in the Tideflats can only expand if they are developing low carbon fuels, that will serve us with cleaner energy for generations to come.

We have less than a decade to realign our economy and communities around a low carbon future, and decades more of progress that can only truly begin once we stop fossil fuel expansions.

City Council, please pass policy that will -

- Stop the expansions of dirty fuels like oil & fracked gas
- Incentivize renewable & low carbon fuels
- Ensure there are minimal industrial impacts to residential areas as Pierce County continues to grow

Tacoma needs sensible policies for managed growth, and that starts by making room for cleaner industries and communities. No longer can Tacoma afford to be corporate polluters' favorite city, we must be a city that leads on climate because the stakes are too high.

Thank you,

Thank you,

Subject: Tideflats regulations that limit expansion of existing fossil fuel facilities
Date: Wednesday, August 11, 2021 2:14:09 PM

IPS IPS Committee ,

Dear IPS Chair & Vice-chair,

Please pass strong Tideflats regulations that do not allow expansion of existing fossil fuel infrastructure.

As you know, a recent major United Nations scientific report has stated that rising world temperatures are now inevitable and that only a rapid shift away from fossil fuels can allow us to avoid the most serious global warming catastrophes.

I request that the City Council please pass policies that will stop the expansions of facilities that supply fossil fuels such as oil and fracked gas and support the expansion of renewable energy infrastructure.

Thank you for your time reading my requests.
